Getting Started

What Merchants Do on AdPlatform

As a Merchant, you:

- 1. **Manage Offers** — Define discounts, rewards, and incentives for campaigns
- 2. **Approve Redemptions** — Verify customer purchases and approve rewards
- 3. **Track Sales** — See revenue generated from AdPlatform-attributed customers
- 4. **Control Inventory** — Pause redemptions if supplies are low
- 5. **Monitor Performance** — Track conversion rates and customer satisfaction
- 6. **Integrate Systems** — Connect your POS, e-commerce, or inventory systems

Merchant vs Advertiser

Role	Focus	Actions
Advertiser	Campaign creation & optimization	Create ads, set budgets, manage targeting
Merchant	Fulfilling customer orders	Approve redemptions, process returns, track sales

A merchant is typically the **brand** or **business** offering the product/service. An advertiser is the **agency** or **marketer** promoting the product.

Example: Nike (merchant) offers 30% discount. Ad agency (advertiser) creates ad campaign. Customers see ad and claim discount at Nike store.

Merchant Dashboard

Access Your Dashboard

URL: <https://adplatform.example.com/dashboard/merchant>

Key Sections:

- 1. **Overview** — Real-time stats and pending items
- 2. **Redemptions** — Queue of redemptions to approve/deny
- 3. **History** — Past redemptions and analytics
- 4. **Offers** — Active campaigns and their terms
- 5. **Settings** — Integration keys and merchant info
- 6. **Reports** — Revenue and conversion tracking

Dashboard Overview

Example Overview Card:

```
{
  "success": true,
  "data": {
    "pending_approvals": 12,
    "approved_today": 47,
    "total_revenue_today": 1450.50,
    "active_campaigns": 3,
    "fulfillment_rate": 98.5,
    "customer_satisfaction": 4.7,
    "inventory_status": "healthy"
  }
}
```

Real-Time Metrics

```
GET /api/v1/merchant/dashboard/metrics?period=today
```

Response:

```
{
  "success": true,
  "data": {
    "period": "2026-05-17",
    "metrics": {
      "total_redemptions": 127,
      "approved_redemptions": 125,
      "denied_redemptions": 2,
      "total_revenue": 3750.50,
      "average_transaction_value": 29.53,
      "fulfillment_time_avg": 2.3,
      "customer_satisfaction_score": 4.8,
      "repeat_customer_rate": 32
    }
  }
}
```

QR Code Redemption Workflow

How Redemptions Work

Step 1: Customer Receives Offer

- Customer sees a AdPlatform campaign with an offer (e.g., "30% off Nike shoes")
- They receive a unique QR code valid for 2 minutes

Step 2: Customer Visits Store

- Customer goes to your physical store or website
- Shows QR code at checkout or enters code

Step 3: You Scan/Enter Code

- Scan QR code with mobile device or POS terminal
- Or enter code manually
- System verifies code is valid and not already used

Step 4: Customer Completes Purchase

- Customer pays (with or without discount applied)
- Transaction is recorded

Step 5: You Approve Redemption

- Review purchase details
- Confirm customer used the discount/reward
- Tap "**Approve**" in AdPlatform dashboard

Step 6: Payment Settled

- AdPlatform deducts reward cost from advertiser's account
- You receive payment (less AdPlatform fee)

Verify a QR Code

Mobile App (POS):

1. Open AdPlatform Merchant app
2. Tap "**Scan QR**"
3. Point camera at code
4. System shows:
 - Customer name
 - Offer details
 - Discount amount
 - Offer validity

Web Dashboard:

1. Go to **Redemptions** → **New**
2. Paste QR code or enter code manually
3. System validates code

API:

```
POST /api/v1/redemptions/verify
```

Request:

```
{  
  "qr_code": "CAMP_456_USR_123_ABC123"  
}
```

Response:

```
{
  "success": true,
  "data": {
    "redemption_id": "red_123",
    "qr_code": "CAMP_456_USR_123_ABC123",
    "status": "valid",
    "customer": {
      "user_id": "user_123",
      "name": "John Customer"
    },
    "offer": {
      "campaign_id": "camp_456",
      "campaign_name": "30% Off Nike Shoes",
      "discount_amount": 29.99,
      "discount_type": "percentage",
      "discount_value": 30
    },
    "validity": {
      "created_at": "2026-05-17T14:00:00Z",
      "expires_at": "2026-05-17T14:02:00Z",
      "remaining_seconds": 45
    }
  }
}
```

Approve & Deny Redemptions

View Pending Redemptions

Dashboard: Merchant → **Redemptions** (pending tab)

Or via API:

```
GET /api/v1/redemptions?status=pending&limit=50
```

Response:

```
{
  "success": true,
  "data": [
    {
      "redemption_id": "red_001",
      "qr_code": "CAMP_456_USR_123_ABC123",
      "customer_name": "John Customer",
      "offer": "30% Off Nike Shoes",
      "discount_amount": 29.99,
      "transaction_date": "2026-05-17T14:30:00Z",
      "status": "pending_approval",
      "verified_at": "2026-05-17T14:30:05Z"
    },
    {
      "redemption_id": "red_002",
      "qr_code": "CAMP_789_USR_456_DEF456",
      "customer_name": "Jane Buyer",
      "offer": "Free Shipping",
      "discount_amount": 5.99,
      "transaction_date": "2026-05-17T13:45:00Z",
      "status": "pending_approval",
      "verified_at": "2026-05-17T13:45:20Z"
    }
  ]
}
```

Approve a Redemption

Dashboard: Click "**Approve**" on pending item

Or via API:

```
POST /api/v1/redemptions/red_001/approve
```

Request:

```
{
  "notes": "Customer purchased Nike Air Max 90 for $99.99; applied 30% discount"
}
```

Response:

```
{
  "success": true,
  "data": {
    "redemption_id": "red_001",
    "status": "approved",
    "approved_at": "2026-05-17T14:32:00Z",
    "reward_payout": {
      "advertiser": "Nike",
      "advertiser_cost": 29.99,
      "merchant_payout": 28.49,
      "adplatform_fee": 1.50,
      "settlement_date": "2026-05-24"
    }
  }
}
```

Deny a Redemption

Dashboard: Click **"Deny"** button

Or via API:

```
POST /api/v1/redemptions/red_001/deny
```

Request:

```
{
  "reason": "customer_no_show",
  "notes": "Customer did not complete purchase; returned items"
}
```

Response:

```
{
  "success": true,
  "data": {
    "redemption_id": "red_001",
    "status": "denied",
    "denied_at": "2026-05-17T14:32:00Z",
    "reason": "customer_no_show",
    "notes": "Customer did not complete purchase; returned items"
  }
}
```

Denial Reasons

Reason	Description
code_invalid	Code already used or invalid
customer_no_show	Customer didn't complete purchase
fraud_suspected	Suspicious activity detected
duplicate_claim	Customer already claimed this offer
expired_code	Code expired

not_applicable Offer doesn't apply to this product

Batch Approve Redemptions

POST /api/v1/redemptions/batch-approve

Request:

```
{
  "redemption_ids": ["red_001", "red_002", "red_003"],
  "notes": "Processed on 2026-05-17 at register 3"
}
```

Redemption History & Analytics

View All Redemptions

GET /api/v1/redemptions?page=1&limit=100

Filter options:

- status — pending, approved, denied
- campaign_id — Filter by campaign
- start_date — Filter by date range
- end_date
- min_amount — Filter by discount amount
- max_amount

Get Redemption Details

GET /api/v1/redemptions/red_001

Response:

```

{
  "success": true,
  "data": {
    "redemption_id": "red_001",
    "qr_code": "CAMP_456_USR_123_ABC123",
    "campaign": {
      "campaign_id": "camp_456",
      "campaign_name": "30% Off Nike Shoes",
      "advertiser": "Nike Inc.",
      "offer_type": "percentage_discount",
      "offer_value": 30,
      "max_redemptions": 500,
      "redemptions_count": 287
    },
    "customer": {
      "user_id": "user_123",
      "email": "john@example.com",
      "phone": "555-0123"
    },
    "transaction": {
      "amount": 99.99,
      "currency": "USD",
      "items": [
        {
          "name": "Nike Air Max 90",
          "quantity": 1,
          "unit_price": 99.99
        }
      ],
      "discount_applied": 29.99,
      "total_after_discount": 70.00
    },
    "status": "approved",
    "verified_at": "2026-05-17T14:30:05Z",
    "approved_at": "2026-05-17T14:32:00Z",
    "settlement_date": "2026-05-24",
    "notes": "Customer satisfied; may return for loyalty program"
  }
}

```

Analytics: Revenue by Campaign

```
GET /api/v1/redemptions/analytics/by-campaign?period=month
```

Response:

```
{
  "success": true,
  "data": {
    "period": "May 2026",
    "total_revenue": 12450.50,
    "campaigns": [
      {
        "campaign_name": "30% Off Nike Shoes",
        "advertiser": "Nike",
        "redemptions": 287,
        "total_discount_given": 8625.13,
        "revenue_attributed": 2247.50,
        "profit": 1869.49
      },
      {
        "campaign_name": "Free Shipping",
        "advertiser": "Amazon",
        "redemptions": 145,
        "total_discount_given": 869.55,
        "revenue_attributed": 4321.75,
        "profit": 4000.00
      }
    ]
  }
}
```

Daily Redemption Summary

```
GET /api/v1/redemptions/summary?date=2026-05-17
```

Response:

```
{
  "success": true,
  "data": {
    "date": "2026-05-17",
    "total_redemptions": 127,
    "total_approvals": 125,
    "total_denials": 2,
    "approval_rate": 98.4,
    "total_discount_given": 2150.75,
    "total_revenue": 3750.50,
    "average_transaction": 29.53,
    "peak_hour": "12:00-13:00",
    "peak_hour_redemptions": 23
  }
}
```

Export Redemption Report

```
GET /api/v1/redemptions/export?format=csv&start_date=2026-05-01&end_date=2026-05-31
```

Formats:

- csv — For spreadsheets
 - pdf — For sharing with accountant
 - json — For system integration
-

Dynamic Redemption Control

Pause Campaign Redemptions

If you run out of inventory or want to stop accepting a specific offer:

```
PATCH /api/v1/redemptions/campaign/camp_456/control
```

Request:

```
{
  "accepting_redemptions": false,
  "reason": "Out of stock",
  "pause_until": "2026-05-20T00:00:00Z"
}
```

Customers can still see the campaign, but can't claim new QR codes.

Resume Campaign Redemptions

```
PATCH /api/v1/redemptions/campaign/camp_456/control
```

Request:

```
{
  "accepting_redemptions": true
}
```

Set Redemption Limits

```
PATCH /api/v1/redemptions/campaign/camp_456/control
```

Request:

```
{
  "daily_limit": 50,
  "daily_limit_per_customer": 1,
  "max_discount_per_transaction": 100
}
```

Now:

- Maximum 50 redemptions per day
- Each customer can redeem max 1 time per day
- Each discount capped at \$100

Check Redemption Status

```
GET /api/v1/redemptions/campaign/camp_456/status
```

Response:

```
{
  "success": true,
  "data": {
    "campaign_id": "camp_456",
    "campaign_name": "30% Off Nike Shoes",
    "accepting_redemptions": true,
    "daily_limit": 50,
    "redemptions_today": 47,
    "remaining_capacity": 3,
    "status_message": "Only 3 slots remaining for today",
    "daily_limit_per_customer": 1,
    "max_discount_per_transaction": 100
  }
}
```

Auto-Pause on Low Inventory

Set up automatic pause when inventory threshold is reached:

```
POST /api/v1/redemptions/campaign/camp_456/auto-pause
```

Request:

```
{
  "inventory_tracking": true,
  "low_inventory_threshold": 10,
  "inventory_item_sku": "SKU-NIKE-AIR-MAX-90",
  "action": "auto_pause"
}
```

When inventory drops below 10 units, campaign auto-pauses and you're notified.

Campaign Integration

View Your Active Campaigns

```
GET /api/v1/merchant/campaigns?status=active
```

Response:

```
{
  "success": true,
  "data": [
    {
      "campaign_id": "camp_456",
      "name": "30% Off Nike Shoes",
      "advertiser": "Nike Inc.",
      "status": "ACTIVE",
      "budget": 5000,
      "budget_spent": 2850,
      "budget_remaining": 2150,
      "offer_type": "percentage_discount",
      "offer_value": 30,
      "start_date": "2026-05-01",
      "end_date": "2026-05-31",
      "redemptions_total": 287,
      "redemptions_approved": 285,
      "redemptions_denied": 2,
      "revenue_attributed": 8625,
      "customer_satisfaction": 4.8
    }
  ]
}
```

Update Campaign Offer Terms

Some campaigns allow you to modify offer terms dynamically:

```
PATCH /api/v1/merchant/campaigns/camp_456
```

Request:

```
{
  "offer_value": 25,
  "max_redemptions": 200,
  "valid_products": ["SKU-001", "SKU-002"]
}
```

Not all campaigns allow modification (depends on advertiser settings).

View Campaign Performance

```
GET /api/v1/merchant/campaigns/camp_456/performance
```

Response:

```
{
  "success": true,
  "data": {
    "campaign_id": "camp_456",
    "period": "May 2026",
    "impressions": 45000,
    "clicks": 890,
    "click_through_rate": 1.98,
    "redemptions": 287,
    "redemption_rate": 32.2,
    "revenue_total": 8625,
    "revenue_attributed": 5000,
    "customer_acquisition_cost": 2.50,
    "customer_satisfaction": 4.8,
    "repeat_purchase_rate": 28
  }
}
```

Point-of-Sale Integration

Integrate with Your POS System

If you have a POS terminal (register), integrate AdPlatform redemptions:

Option 1: QR Code Scanner

Most modern POS systems can scan QR codes. Simply point the camera at the code.

Option 2: Manual Code Entry

If scanner isn't available, customer can provide the code:

```
POST /api/v1/redemptions/verify-by-code
```

Request:

```
{
  "code": "CAMP456USR123ABC123"
}
```

Option 3: API Integration

If you have a custom POS system, integrate via API:

```
// Node.js example
const axios = require('axios');

async function verifyAdPlatformCode(code) {
  const response = await axios.post(
    'https://adplatform.example.com/api/v1/redemptions/verify-by-code',
    { code },
    {
      headers: {
        'Authorization': `Bearer ${process.env.MERCHANT_API_KEY}`,
        'Content-Type': 'application/json'
      }
    }
  );

  const { offer, discount_amount, customer_name } = response.data.data;

  // Display to cashier
  console.log(`Offer: ${offer}`);
  console.log(`Discount: -${discount_amount}`);
  console.log(`Customer: ${customer_name}`);

  return response.data.data;
}

// In checkout flow
const redemption = await verifyAdPlatformCode(customerProvidedCode);
applyDiscount(redemption.discount_amount);
```

Option 4: Web Dashboard

Simple and fastest: use web dashboard to scan/approve on a tablet.

Fraud Prevention

Fraud Detection System

AdPlatform automatically flags suspicious redemption patterns:

```
GET /api/v1/redemptions/fraud-alerts
```

Response:

```
{
  "success": true,
  "data": {
    "alerts": [
      {
        "alert_id": "fraud_001",
        "severity": "high",
        "type": "duplicate_code_attempt",
        "description": "Code CAMP456... attempted to be redeemed twice within 1 minute",
        "redemption_id": "red_001",
        "timestamp": "2026-05-17T14:30:00Z",
        "action": "auto_denied",
        "status": "resolved"
      },
      {
        "alert_id": "fraud_002",
        "severity": "medium",
        "type": "bulk_redemptions",
        "description": "Customer redeemed 5 codes in 10 minutes from different campaigns",
        "customer_id": "user_789",
        "redemption_count": 5,
        "action": "flagged_for_review",
        "status": "pending_review"
      }
    ]
  }
}
```

Common Fraud Patterns (Automatically Blocked)

Pattern	Detection	Action
Duplicate Code	Code scanned twice	Auto-deny second attempt
Expired Code	Code beyond 2-min window	Auto-deny
Bulk Redemptions	10+ codes in 1 hour	Flag customer for review
High-Value Stacking	Multiple high-value codes in short time	Flag for approval
VPN/Proxy	Non-residential IP	Flag customer

Approve Suspicious Redemptions

If a flagged redemption is legitimate:

```
POST /api/v1/redemptions/red_001/approve-with-review
```

Request:

```
{
  "reviewed_by": "merchant@store.com",
  "review_status": "legitimate",
  "notes": "Customer is corporate buyer; bulk redemption for team event"
}
```

Report Fraudulent Activity

POST /api/v1/redemptions/report-fraud

Request:

```
{
  "redemption_id": "red_001",
  "fraud_type": "stolen_code",
  "description": "Customer showed ID that didn't match the account",
  "action_taken": "denied_redemption"
}
```

API Reference for Merchants

Redemption Management

Endpoint	Method	Description
/api/v1/redemptions	GET	List redemptions (pending, approved, denied)
/api/v1/redemptions/:redId	GET	Get redemption details
/api/v1/redemptions/verify	POST	Verify QR code
/api/v1/redemptions/verify-by-code	POST	Verify by code string
/api/v1/redemptions/:redId/approve	POST	Approve redemption
/api/v1/redemptions/:redId/deny	POST	Deny redemption
/api/v1/redemptions/batch-approve	POST	Approve multiple

Dynamic Control

Endpoint	Method	Description
/api/v1/redemptions/campaign/:campId/control	PATCH	Pause/resume campaign
/api/v1/redemptions/campaign/:campId/status	GET	Check redemption status
/api/v1/redemptions/campaign/:campId/auto-pause	POST	Set auto-pause rules

Analytics

Endpoint	Method	Description

/api/v1/merchant/campaigns/:campId/performance	GET	Campaign performance

Fraud

Endpoint	Method	Description
----------	--------	-------------

/api/v1/redemptions/fraud-alerts GET View fraud alerts
/api/v1/redemptions/report-fraud POST Report fraudulent activity

Troubleshooting

Issue: QR Code Won't Scan

Possible Causes:

1. Code expired (2-minute window)
2. Code already redeemed
3. Camera quality issues
4. Code damaged/pixelated

Solution:

1. Request new code from customer
2. Enter code manually instead of scanning
3. Ensure good lighting and steady camera
4. Try manual code entry: POST /api/v1/redemptions/verify-by-code

Issue: Redemption Stuck as Pending

Possible Causes:

1. System waiting for your approval
2. Fraud flag under investigation
3. Connection error during submission

Solution:

```
# Check redemption status
curl -X GET https://adplatform.example.com/api/v1/redemptions/red_001 \
-H "Authorization: Bearer MERCHANT_TOKEN"

# Force approve if legitimate
curl -X POST https://adplatform.example.com/api/v1/redemptions/red_001/approve \
-H "Authorization: Bearer MERCHANT_TOKEN" \
-H "Content-Type: application/json" \
-d '{"notes": "Manual approval after review"}'
```

Issue: High Fraud Alerts

Possible Causes:

1. Customers redeeming multiple codes legitimately
2. Corporate/bulk orders
3. Suspicious patterns that are false positives

Solution:

1. Review fraud alert details
2. If legitimate, approve and add note

3. If persistent, contact AdPlatform support to adjust fraud thresholds

Issue: Payment Not Received

Possible Causes:

1. Redemptions not yet approved
2. Settlement period (5-7 business days)
3. Account verification pending
4. Payment method issue

Solution:

```
# Check settlement status
curl -X GET https://adplatform.example.com/api/v1/merchant/settlements \
-H "Authorization: Bearer MERCHANT_TOKEN"

# View bank account on file
curl -X GET https://adplatform.example.com/api/v1/merchant/payment-methods \
-H "Authorization: Bearer MERCHANT_TOKEN"
```

Issue: Campaign Not Showing in My List

Possible Causes:

1. Campaign not yet approved by advertiser
2. Campaign targeting doesn't include your store/location
3. Campaign status is not ACTIVE

Solution:

```
# Check all campaigns (including inactive)
curl -X GET "https://adplatform.example.com/api/v1/merchant/campaigns?status=all" \
-H "Authorization: Bearer MERCHANT_TOKEN"

# Check campaign details
curl -X GET https://adplatform.example.com/api/v1/merchant/campaigns/camp_456 \

```

Best Practices

Efficiency

1. **Batch Approvals** — Process pending redemptions in batches at end of day
2. **Set Auto-Pause** — Enable auto-pause when inventory is low
3. **Use POS Integration** — Integrate with register to speed up checkout
4. **Keyboard Shortcuts** — Approve/deny with arrow keys

Fraud Prevention

1. **Verify ID** — Ask for photo ID on high-value redemptions
2. **Spot Patterns** — Monitor for bulk redemption attempts

3. **Report Suspicious** — Flag unusual activity immediately
4. **Set Limits** — Use daily/per-customer limits to prevent abuse

Customer Service

1. **Be Quick** — Approve within 1 hour for best customer experience
2. **Be Transparent** — Explain any denials clearly
3. **Check Stock** — Ensure product is available before approval
4. **Get Feedback** — Ask customers about their AdPlatform experience

Compliance

1. **Keep Records** — Export and archive redemption reports monthly
2. **Track Revenue** — Reconcile AdPlatform payouts with your sales
3. **Honor Terms** — Follow agreed discount terms exactly
4. **Report Issues** — Notify AdPlatform of fraud or system issues
